

Accurate,  
life-size model of  
the Vanguard Satellite  
which was placed into orbit  
March 17, 1958.  
The solar battery  
and semi conductors  
developed by the Bell Laboratories  
are an integral part  
of the Vanguard  
and many other satellites.  
The signal you hear  
is produced  
by converting energy  
from the sun  
operate  
transistors.
